Down in South Carolina, said the Hon, W. J. Talbert of Bouth Carolina in a speech in the house, there was a man who hired the nome, there was a man who aired a lawyer to conduct a case in court. As the lawyer was not talking exactly to suit him, he got up to make a few remarks nimeelf. The judge of course made him take his seat. He got up again, and the judge made him take his seat again. A third and fourth time this happened, and fourth time this happened, and fourth the old former got up and said.

finally the old farmer got up and said:
"Well, Judge, if you wan't let me talk,
won't you let me think!" "Why, certainly," replied the judge, "Well, Judge," he
said, "I think you and all these lawyers
are a set of d—d racculs."—San Franclace Areassait. cisco Argonaut. Lily's Predictions. Lilly, the great English astrologer, annually published a little leaflet under the title of "Astrological Predictions." In the one for 1648 occurs the following, "In the year 1668 the aphelium of Mars will be in Virgo and all kinds and sorts of disasters.

vigo and all kinds and sorts of disastes to the common wealth, monarchy and kingdom of England may be expected in that and the two fallowing years."

It is needless to add that 1665 brought the "great pingue," which carried away 68,556 people and 1660 was the year of the "great fig." in which 13,230 houses were destroyed.—St. Louis Republic.

It is needless to add that 1665 brought the "great flague," which carried away 68,000 people and 1660 was the year of the "great flag." in which 13,250 houses were destroyed.—St. Louis Republic.

Wonderful Invention.

The weight and dimensions of each and every place in the construction of a United fitters warship is computed before marting to make any of them. Such a great volume of computation is too match for the brain. Formerly much of it was performed an manhines made in Europe, but now 20 per cent of it is computed on complementary, invented by Durr R. Felt of Chicago. The saiding and other calculations in hany of the accounting departments of the government are done in the same manner.—Chicago Heraid.

Bydrogen and Oxygen Gases.

Chemical experiments prove that hydrogen and oxygen gases will combine with troumendous volence at very high pressure —2,700 pounds to the square fach. In these experiments a small glass tube was employed, into the ends of which two partitions wire were fused, and after introducing a cubic centimeter of acidulated water and an electric current of six volts.

There are fashions in speech as well as fashions in clothes. Everything in society just now is either "awfully glassis" or "awfully charming, don't, you know "If your new bonnet in't awfully glassiy, it must be awfully charming, and if Miss Fourstars' singing at the local concert the other evening wasn't awfully charming then it must certainly have been awfully ghastly. Pretty is no longer pratty, but pooty. Y—, the famous man milliner, has except the trick from his duchess cushas caught the trick from his duchess cus-tomers. You hear him talk githly of poo-ty gowns and pooty gails. Gorgeous or deadly are the correct adjectives to use when speaking of the weather. Nowadays it is quite customary for educated people to talk of the dool. In quite aristocratic circles the final g is dropped in many words. They talk of ridin, also tin, talk-in, singin. I suppose the next thing we shall hear will be that they have ceased to appraise their b's for the excellent rea-son that it has become so common for er-dinary folks to do so.—Pall Mall Budget.
